

1. How do you apply command to check node version?

- ☐ nodejs -v
- ☐ nodejs
- ☒ node -v
- ☐ node -version

2. The logic and data required to support the template are provided by its

---

- ☐ Model
- ☒ Component
- ☐ Templates
- ☐ Module

3. Which command is used to create angular app?

- ☐ Angular new appName
- ☐ Ng create appName
- ☒ Ng new appName
- ☐ Ng create new appName

4. The command to build angular application for production is

- ☐ Ng serve
- ☐ Ng new

☐ Ng build

☐ Ng create

5. Which of the following is a filter in Angular Js

☐ Currency

☐ Date

☐ Uppercase

☐ All of the above

6. Which keyboard command is used to terminate any angular process

☐ Ctrl+c

☐ Ctrl+p

☒ Ctrl+z

☐ Ctrl+d

7. Which decorator is used to provide the configuration information through the properties?

☐ @Component

☐ @NgModule

☐ @RootModule

☐ All

8. Which file is acts as placeholder for basic angular app?

- ☐ main.ts
- ☐ app.module.ts
- ☒ index.html
- ☐ app.template.html

9. Angular works on what page?

- ☐ Round trip application
- ☐ Single page application
- ☒ both
- ☐ none

10. What do you mean by NPM ?

- ☒ Node Package Manager
- ☐ Node Packet Manager
- ☐ Node Project Manager
- ☐ Node Package Machine

1. Which of the following is correct about TypeScript?

- ☐ Angular is based on TypeScript
- ☐ This is a superset of JavaScript
- ☐ TypeScript is maintained by Microsoft

☒ All

2. Angular configuration file name is:

☐ Package.json

☐ Composer.json

☒ Angular.json

☐ Config.json

3. What is the main purpose of RESTful web services?

☒ To perform CRUD operation on HTTP Request

☐ To perform CRUD operation without HTTP Request

☐ To perform web request other than CRUD operation

☐ To perform CRUD operation with TCP/IP Request

4. Which of the following command is correct for installing angular-cli?

☒ npm install -g @angular/cli

☐ npm install -global @angular/cli

☐ npm install -g angular/cli

☐ npm install --global angular/cli

5. The decorator provides configuration information through its:

☒ properties

☐ objects

☐ class

☐ method

6. which models represent just data passed from the component to the template?

☒ View models

☐ Domain models

☐ Service models

☐ None

7. TypeScript file extension is \_\_\_\_

☐ js

☐ es

☒ ts

☐ tts

8. The style of development that Angular supports is derived through the use of \_\_\_\_\_ pattern

☐ pattern

☒ Model-View-Controller

☐ User-Logic-Model

☐ Model-Template-Controller

9. Which ng command performs the production build process?

☐ Ng start

☐ Ng lint

☒ Ng build

☐ Ng test

10. Which keyword is used to identify data or types that you want to use elsewhere in the application?

☐ Import

☒ Export

☐ New

☐ Add

11. Which command starts the Angular development tools:

☐ Ng new

☒ Ng serve

☐ Ng run

☐ Ng start

12. ngModel directive is used for-

☐ One-way binding

☒ Two-way binding

☐ Refer element in the template

☐ All

13. Which of the following directive allows us to use form?

- ☐ ng-include
- ☒ ng-form
- ☐ ng-bind
- ☐ ng-attach

14. What does CSS stand for?

- ☐ Cascading Style Sheet
- ☐ Cascading Sheet of Style
- ☒ Cascading Style Sheets
- ☐ None

15. Which directive can be used to set multiple style properties?

- ☐ ngClass
- ☐ ngStyle
- ☒ Both A and B
- ☐ None

16. TypeScript is a superset of JavaScript

- ☒ True
- ☐ False

17. Which of the following typescript feature is used to reduce the common JavaScript errors?

- ☐ Export

- ☐ Import
- ☐ Both A and B
- ☒ None

18. In angular, controllers are called

- ☐ Module
- ☒ component
- ☐ servic
- ☐ model

19. Each TypeScript file in the project acts as

- ☐ Model
- ☒ Module
- ☐ Compoment
- ☐ Both B and C

20. The angular-cli setup for the project created a template file called \_\_\_\_\_ in the src/app folder.

- ☐ App.model.ts
- ☒ app.component.html
- ☐ app.component.js
- ☐ app.component.css

21. Which of the following model passes data from component to template?

- ☐ Root model
- ☒ View model
- ☐ Domain model
- ☐ All

1. why creating view data is important in angular?

- to simplify templates and their interactions with the component
- to create relationship between models and app systems.
- to generate correct way to connect angular app.
- to connect angular with database.

2. In angular, Default root module name is

- module.ts
- app.module.ts
- module.js
- app.module.js

3. TypeScript is a\_\_ language

- Open Source
- Closed
- Free
- All of the above

4. Which keyword is used to identify data or types that you want to use elsewhere in the application?

- Import
- Export
- New
- Add

5. Which of the following typescript feature is used to reduce the common JavaScript errors?

- Export
- Import
- Both A and B
- None

6. Which type of web application requires a lot of bandwidth?

- One-page
- Single-page
- Multiple-page
- Round-trip
